~~SECRET~~

MEMORANDUM FOR: DON RUMSFELD  
FROM: DICK CHENEY *R. Cheney*  
SUBJECT: The Olson Matter / CIA Suicide

Attached is a proposed brief statement for the President to use at his Press Conference. It would be best for him to use it in response to a question, although if he wished, he can use it as an opening statement.

There is also attached a four page memo prepared by the Civil Division, the Department of Justice, based upon information obtained from the CIA regarding the events surrounding Mr. Olson's death.

Rod Hills has questions concerning the last paragraph of the Justice Department memo which expresses the Justice Department opinion that court action against the U. S. would be barred. He will pursue the matter with the Attorney General.

At this point, we do not have enough information to be certain we know all of the details of this incident. Furthermore, there are serious legal questions that will have to be resolved concerning the Government's responsibility, the possibility of additional compensation, and the possibility that it might be necessary to disclose highly classified national security information in connection with any court suit, or legislative hearings on a private bill intended to provide additional compensation to the family.

Determined to be an administrative marking  
Cancelled per E.O. 12356, Sec. 1.3 and  
Archivist's memo of March 16, 1983

By DAD NARS date 5/20/83

Declassified  
Photocopy from Gerald R. Ford Library

Therefore, Marsh, Hills and Cheney strongly recommend that the President limit his remarks to an expression of regret over this tragic event and a willingness to meet personally with Mrs. Olson and her children to offer an apology on behalf of the Government. Any discussion that goes beyond those issues raises questions which we are not yet in a position to answer.

In response to any questions which go beyond the above, we would recommend that the President indicate that the entire matter, both with regard to the adequacy of compensation and circumstances surrounding Mr. Olson's death, are under review by the Justice Department.

**Attachments**

cc: Jerry Jones

As An Answer To A Question or An Opening Statement

The recent disclosure of the facts concerning the death of Dr. Frank Olson are of great concern to me. I am equally distressed by the fact that the full details of Dr. Olson's death were not made known to Mrs. Olson and other members of his family.

Mrs. Olson and her family deserve our deepest sympathy.

I hope to meet with the family at the earliest opportunity to personally extend an apology on behalf of the United States Government.

Justice Department Report

The Rockefeller Report states on p. 226:

"In the late 1940's, the CIA began to study the properties of certain behavior-influencing drugs (such as LSD) and how such drugs might be put to intelligence use. This interest was prompted by reports that the Soviet Union was experimenting with such drugs and by speculation that the confessions introduced during trials in the Soviet Union and other Soviet Bloc countries during the late 1940's might have been elicited by the use of drugs or hypnosis. Great concern over Soviet and North Korean techniques in 'brainwashing' continued to be manifested into the early 1950's. "

Dr. Frank A. Olson, a bio-chemist, was a civilian employee of the Army working at Fort Detrick in a cooperative effort with the CIA. On November 19, 1953, at one of the periodic meetings of Ft. Detrick and CIA personnel, a dosage of LSD was placed by CIA personnel in drinks consumed by Dr. Olson and others, all of whom were members of the group. Prior to receiving the LSD, Dr. Olson had participated in discussions where the testing of such substances on unsuspecting subjects was agreed to in principle. However, neither Dr. Olson, nor any of the others was made aware that they had been given LSD until about 20 minutes after the fact.

Declassified  
Photocopy from Gerald R. Ford Library

During the next several days Dr. Olson developed side effects, as a result of which he was taken to New York City on November 24, 1953, to be treated by a doctor who was a consultant to the agency on drug-related matters, Dr. Harold A. Abramson. On November 24, 25 and 26, he met with Dr. Abramson.

After seeing him on the 27th, Dr. Abramson believed that hospitalization would be in Dr. Olson's best interest. Arrangements were made for a hospital room near Dr. Olson's home (in the Washington area), but his room could not be prepared until the following day. Consequently, Dr. Lashbrook, of CIA, and Dr. Olson stayed at the Hotel Statler in New York on the night of November 27.

Dr. Lashbrook reported that during cocktails and dinner Dr. Olson appeared cheerful and spoke freely of his forthcoming hospitalization. Lashbrook and Olson retired at about 11:00 PM. They occupied separate twin beds in the same room on the tenth floor. At approximately 2:30 Saturday morning, Lashbrook was awakened by a loud noise; he reported that Olson had crashed through

Declassified  
Photocopy from Gerald R. Ford Library

the closed window blind and closed window and had fallen to his death.

The CIA General Counsel rendered an opinion that the death resulted from "circumstances arising out of an experiment undertaken in the course of his official duties for the U. S. Government.

The Bureau of Employee's Compensation adopted this view, thus awarding survivor benefits to the widow and children. To date \$143,582.22 have been paid to the widow and three children. These tax-free benefits continue to be paid in the current total amount of \$792.00 per month. The payments to the children terminate when they reach majority (as two already have), but the widow's benefits continue until death or re-marriage, and are periodically adjusted for cost of living increases.

The CIA has never made any contact with the family. Prior to the publication of the Rockefeller Report, no government representative has ever disclosed the full details concerning Dr. Olson's death.

Upon a preliminary review of the facts, it is the opinion of Justice Department lawyers that any tort action against the United States arising out of the above-stated facts would be barred by the Federal Employees' Compensation Act, and specifically 5 USC 8116(c). This Act would not bar suit against any individuals.

July 16, 1975

MEMORANDUM FOR THE PRESIDENT

THROUGH: JERRY JONES  
JAMES CONNOR

FROM: RODERICK HILLS R. H.

SUBJECT: Scheduling of Meeting re Invitation to Mrs. Frank Olson and her three children to meet with the President

The circumstances of the death of Dr. Frank A. Olson are described in a previously submitted memorandum, a copy of which is attached (Tab A). His widow and her three children have indicated their shock and outrage at the circumstances surrounding Dr. Olson's death and the fact that the details have been concealed from them for 20 years (See news story at Tab B). The Olson family has hired David Rudovsky to represent them and he has indicated the intention of the family to sue for several million dollars. This memorandum will deal with the question of what considerations are relevant in deciding whether the President should meet with Mrs. Olson and her three children to express his sympathy on behalf of the American people and his apology on behalf of the United States Government.

1. The fact that the President expresses his own outrage at the circumstances of Dr. Olson's death could be some encouragement to the family's determination to sue and could also raise their expectation as to the amount of money they expect to receive in settlement of that law suit. It could also affect the judge who tries the case and will have the authority to set damages.

While this is a factor in determining whether or not to meet with the Olsons, it is not, in our judgement, a conclusive factor, given the circumstances of this incident.

2. The intensity of the family's reaction and background of the lawyer they have hired do raise some possibility that they may react discourteously toward the President's invitation. This factor, however, we do not regard as material, since any such reaction would be more harmful to them than embarrassing to the President. However, it is conceivable that their lawyer may insist that he be present at such a meeting. We recommend that it be made clear that the lawyer not be invited.

3. The Civil Division of the Department of Justice in its initial memorandum (Tab A) stated "upon preliminary review" it is their opinion that any tort action against the United States by the Olsons would be barred by the Federal Employees Compensation Act on the ground that he was injured "in the course of his official duties" and, therefore, the family is entitled to survivors' benefits and nothing more. ~~with the Civil Division has led to the conclusion that the defense is not conclusive~~

THX  
the

(i) The bizarre circumstances of his death could well cause a court of law to determine as a matter of public policy that he did not die in the course of his official duties.

444

(ii) Dr. Olson's job is so sensitive that it is highly unlikely that we would submit relevant evidence to the court on the issue of his duties.

The latter circumstance may mean as a practical matter we would have no defense against the Olson law suit. In this connection, you should know that the CIA and the Counsel's office both strongly recommend that the evidence concerning his employment not be released in a civil trial. ~~may wish to discuss this matter in more detail at this time~~

There is a statutory provision saying that the finding by the Bureau of Compensation is conclusive but we have some doubts both as to its applicability and constitutionality in this case.

If there is a trial, it is apparent that the Olsons' lawyer will seek to explore all of the circumstances of Dr. Olson's employment

222

1

PHOTOCOPY FROM GERALD FORD LIBRARY

as well as those concerning his death. It is not at all clear that we can keep such evidence from becoming relevant even if the government waives the defense of the Federal Employees Compensation Act. Thus, in the trial it may become apparent that we are concealing evidence for national security reasons and any settlement or judgement reached thereafter could be perceived as money paid to cover-up the activities of the CIA.

*Recommend*

1. For all of the above reasons we recommend that the Attorney General be authorized now to seek to negotiate a settlement with the Olsons' lawyer.

*AAA*

(a) The Civil Division has advised us ~~preliminarily~~ that the case has a settlement value between \$500,000 and \$1 million. ~~I have asked for a final recommendation.~~

*BBB*

(b) The Civil Division also has stated that any settlement may require a private bill to approve the settlement, but they are re-considering this decision in view of point No. 3 above. A private bill in the House would be introduced in Congressman Walter Flowers' subcommittee which probably would not encourage any in depth hearings about Dr. Olson's job. In the Senate the Judiciary Committee assigns private bills to the staff for recommendations back to the full committee. Again, we would expect that there would be only a small chance of extensive hearings on the underlying facts.

(c) Depending upon the exact amount of the settlement and a final decision from the Department of Justice, it may be possible for the Attorney General to approve a settlement and pay it without a private bill.

DECISION:

1. Should Mrs. Olson and her children be invited to a meeting at the White House to receive from the President an expression of sympathy on behalf of the American people and an apology on behalf of the United States Government?

Recommendation: We see no significant objection to such an invitation

Agree

MEMORANDUM FOR: DICK CHENEY  
FROM: RODERICK HILLS  
SUBJECT: Attorneys for the Olson Family

The attorneys for the Olson family are pushing very hard for information and are claiming a lack of cooperation with the CIA and DOD. I cannot be certain, of course, but it appears to me that they have been increasingly belligerent. Rex Lee, Assistant Attorney General, Civil Division, believes that there is no way to settle the case and wishes to take a tough stance. I remain somewhat reluctant at having the Attorney General refuse the Olsons' claim on what will be proved to be a technicality and what may eventually seem to be an attempt to "cover up." Accordingly, I believe that sometime in the next week or two we should attempt to contact the attorneys with the help of the Attorney General or perhaps through an intermediary (Mitch Rogovin, Special Counsel to the CIA has a partner at Arnold and Porter who is quite close to the Olson children) to see if a settlement might not be arranged.

Copies of their letters are attached.

PHOTOCOPY FROM GERALD FORD LIBRARY

7 August 1975

MEMORANDUM FOR: The Director

SUBJECT: Conversation with Mr. David Kairys

1. David Kairys, the attorney for the Olson family, called this afternoon somewhat distressed. The family had reviewed the materials we had made available and appears to believe that Frank Olson was killed by the CIA. Their theory is bottomed on the assumption that Frank Olson was a security risk. Kairys says that the file seems to be more concerned about security than how Olson actually died. Some of his observations in the support of this are as follows:

a. Olson told his wife (with CIA representatives present) that the Agency felt he needed help and that they were going to take him to a psychiatrist in New York.

b. Abramson, in a conversation with Eric Olson, said that he was not treating Frank Olson (this may simply be a question of professional terminology).

c. Abramson is not a psychiatrist.

d. The file indicates that Olson had suicidal tendencies and yet Lashbrook checked him into a room on the tenth floor of a New York City hotel.

e. Abramson recommended institutionalization at an earlier date but no action had been taken.

f. His good friend Col. Ruwet did not accompany him to New York.

2. Kairys then has a series of questions regarding the quality of the investigation and raises such points as:

a. There was no pinning down as to whether Olson was witting or unwitting when he took the drug.

*Memo, Rogovin to Colby, 8/7/75, folder "Frank Olson Gen (1)" Box 20 Schmutts Files*

b. There is no indication of the results of the LSD experiment.

c. There is an indication that Abramson was involved in the LSD program.

d. There is no indication of an independent psychiatric report.

e. There is no evidence to support Houston's charge that culpable negligence was involved.

3. Kairys insists that the family wants to know what happened to Frank Olson. To facilitate this lack of information from the files, Kairys wants to take sworn depositions of CIA people as well as Lashbrook, Abramson and Gottlieb.

4. I explained to Kairys that we had no control over the individuals that he named and, the best the CIA people could do would be merely explain how the files were found in 1974. No one currently employed by the Agency was involved in the 1952 experiments leading to the death of Frank R. Olson.

5. In a letter to Kairys the day that the materials were turned over I asked him to acknowledge in writing our understanding that "the documents turned over to you are for the sole purpose of prosecuting any claim against the United States Government with respect to the death of Frank R. Olson." To my dismay, Kairys indicates that neither he nor the family have any recollection of making the agreement. He says further that they were prepared not to accept the documents if that condition was placed on them. Kairys said that he would be able to obtain the documents under the Freedom of Information Act and consequently would not have agreed to such a limitation on their use. I am afraid he is right about the Freedom of Information Act and I don't plan to make a fuss over this point if you agree. It is somewhat of an irritation, however, since I clearly obtained his agreement.

Roderick Hills (White House)

[Sept. 1970]

## MEMORANDUM FOR THE PRESIDENT

~~FROM~~ THROUGH: RICHARD CHENEY

FROM: RODERICK HILLS

SUBJECT:

The Justice Department and attorneys for the Olson family have met to discuss the claim filed on behalf of the Olson family for the wrongful death of Dr. Frank ~~W.~~ A. Olson. They have reached an impasse and the attorneys have announced their intention to sue.

Although there has been a preliminary negotiation as to the sum of money that could settle the dispute, further negotiations have been frustrated by a somewhat procedural entanglement by the Justice Department and the Olson attorneys. Essentially, the Civil Division believes we have a very good technical defense to the Olsons' claim and the Civil Division is insisting that we win the case on the merits before negotiating a settlement.

The Defense to the Olson Claim. The Civil Division of the Department of Justice is of the opinion that any tort action against the United States by the Olsons is barred by the Federal Employees Compensation Act on the ground that he was injured "in the course of his official duties" and, therefore, the family is entitled to survivors' benefits and nothing more.

There is no doubt but the legal position is substantial even though the Department of Labor determined 22 years ago that

memo, Hills to Cheney, 9/75, Folder "Olson, Frank  
Been (1)" Box 20, Schmitt Files.

Dr. Olson died "in the course of official duties" based upon "false evidence." Moreover, two circumstances affect our analysis of the Justice Department position.

(i) The bizarre circumstances of his death could well cause a court of law to determine as a matter of public policy that he did not die in the course of his official duties.

(ii) Dr. Olson's job is so sensitive that it is highly unlikely that we would submit relevant evidence to the court on the issue of his duties.

The latter circumstance may mean as a practical matter we would have no defense against the Olson law suit. In this connection, you should know that the CIA and the Counsel's office both strongly recommend that the evidence concerning his employment not be released in a civil trial.

In short, there is a significant possibility that a court would either (a) grant full discovery to the Olsons' attorneys to learn of Dr. Olson's job responsibilities; or (b) rule that as a matter of public policy, a man who commits suicide as a result of a drug criminally given him cannot as a matter of law be determined to have died "in the course of his official duties."

If ~~there~~ there is a trial, it is apparent that the Olsons' lawyer will seek to explore all of the circumstances of Dr. Olson's employment as well as those concerning his death. It is not at all clear that we can keep such evidence from becoming relevant even if the government waives the defense of the Federal Employees Compensation Act. Thus, in the trial it may become apparent that we are concealing evidence for national security reasons and any settlement or judgement reached thereafter could be ~~per~~ perceived as money paid to cover-up the activities of the CIA.

ALL caps Recommendation.

For all of the above reasons we recommend that the Attorney General be authorized now to seek to negotiate a settlement with the Olsons' lawyer.

(a) The Civil Division has advised us that the case has a settlement value between \$500,000 and \$1 million, assuming there are no defenses.

(b) The Civil Division also has stated that any settlement may require a private bill to approve the settlement, but they are re-considering this decision in view of point No. 3 above. A private bill in the House would be introduced in Congressman Walter Flowers' subcommittee which probably would not encourage any in depth hearings about Dr. Olson's job. In the Senate the Judiciary Committee assigns private bills to the staff for recommendations back to the full committee. Again, we would expect that there would be only a small chance of extensive hearings on the underlying facts.

[Hills 09/75]

-4-

(c) Depending upon the exact amount of the settlement and a final decision from the Department of Justice, it may be possible for the Attorney General to approve a settlement and pay it without a private bill.

DECISION

Specifically, the issue is whether a claim should be negotiated with the Olson family somewhat above

THE WHITE HOUSE

WASHINGTON

September 30, 1975

MEMORANDUM FOR THE PRESIDENT

THROUGH: RICHARD CHENEY  
FROM: RODERICK HILLS  
SUBJECT: Olson Family Compensation Claim

The pending law suit by the Olson family against the United States Government by reason of the death of Dr. Olson threatens to be a reality this week if no new effort to settle the case is made. The Attorney General has made a final offer of \$500,000 which has been rejected by the Olson family.

The Olson family has countered with a request for \$3 million but has indicated a willingness to settle for less.

Essentially, the Attorney General concludes that the claim of the Olson family is worth \$1 million, but must be discounted by \$500,000 by reason of the possibility that the government will ultimately succeed in the case on the grounds that exclusive remedy for the Olson family comes from the benefits provided by the Federal Employees Compensation Act. In short, the Justice Department argues that there is a substantial possibility that a court will find that Dr. Olson died in the course of his employment.

I frankly disagree with this analysis and believe that there is a real probability that an appellate court would decide that as a matter of law when one dies under the circumstances such as those causing Dr. Olson's death, he cannot be said to have died "in the course of his employment." In any event, the Department of Justice will not

*Memo, Hills to GRF, 9/30/75, folder  
"Frank Olson Gen. (1)" Box 20  
Edward C. Schmults Files.*

offer a larger sum in settlement. However, the Justice Department would support a private bill which would waive the FECA defense for a total of \$1 million and would not object if a private bill provided "compensation for the extraordinary deceit" employed in the case of Dr. Olson. For this element of damages they would provide \$250,000.

Adding all the elements of the Justice Department together, they would then support a private bill for \$1,250,000 and they would also forego an offset of the approximately \$150,000 that the Olson family has received to date in compensatory benefits.

The Justice Department analysis is attached at Tab A.

#### RECOMMENDATION

I recommend that you authorize Special Counsel to the CIA Mitchell Rogovin to attempt a settlement with the Olson family at a sum not to exceed \$1,250,000 plus a waiver of an offset of the monies received to date by the Olson family.

In the event a settlement can be reached within these guidelines, the CIA and the Olson family can jointly petition the Department of Labor to re-consider its 22 year old decision that Dr. Olson did die in the course of his employment. Should the Labor Department so rule, the Justice Department is on record as supporting a settlement of \$1 million without an offset.

The CIA could agree in a settlement with the Olson family that any excess amount would be made the subject of a private bill and supported by the Administration. Alternatively, if the Labor Department does waive the FECA decision, we could ask the Justice Department to re-consider its settlement limitation. In the event that the Labor Department should reaffirm the 22 year old decision that Dr. Olson did die in the course of his employment, we would agree that the private bill would be in the amount of \$750,000.

[NLL-9, 09/30/75]

Mitchell Rogovin should be authorized to attempt a settlement of the Olson family claim for a sum not to exceed \$1,250,000 without an offset.

WASHINGTON, D.C. 20503

December 10, 1975

MEMORANDUM TO MR. SCHMULTS

Subject: Private relief bill for the family of  
Dr. Frank R. Olson

The subject draft bill was sent informally to Labor, Defense, and Justice on the basis that the decision has already been made to support such a bill although it would not be formally proposed by the Executive Branch.

Defense, nevertheless, is extremely concerned about supporting the bill, particularly because of its precedential implications. They indicate that they already have claims from people in the same or similar circumstances as the Olson case. They also questioned the large amount provided in the bill and wondered what it was based on.

Specifically, Defense would like certain changes in the text of the bill as marked on the attached copy. The thrust of their suggestions is that, to mitigate precedential problems, the bill itself need not explicitly accept "responsibility of the United States." They feel that the facts and circumstances of this particular case can better be brought out in the legislative history.

Labor, institutionally, would oppose such a bill as being discriminatory against others covered by FECA. They feel that, if the bill is to be supported, it should at least provide an offset for FECA payments already made to the members of the family. (Their rough guess is that this amounts to \$100,000-\$200,000, but they are going to work up precise figures for each family member.) The Department's proposed language is also marked on the attached copy of the bill.

Justice, under the circumstances, raised no objections.

## A. The Testing of Scientific and Technological Developments Within the United States

While the research and development of new CIA scientific and technical devices is naturally undertaken within the United States, the evidence before this Commission shows that with a few exceptions, the actual devices and systems developed have not been used operationally within this country.<sup>1</sup>

However, the Agency has tested some of its new scientific and technological developments in the United States. One such program included the testing of certain behavior-influencing drugs. Several others involved the testing of equipment for monitoring conversations. In all of the programs described, some tests were directed against unsuspecting subjects, most of whom were U.S. citizens.

### 1. The Testing of Behavior-Influencing Drugs on Unsuspecting Subjects Within the United States

In the late 1940's, the CIA began to study the properties of certain behavior-influencing drugs (such as LSD) and how such drugs might be put to intelligence use. This interest was prompted by reports that the Soviet Union was experimenting with such drugs and by speculation that the confessions introduced during trials in the Soviet Union and other Soviet Bloc countries during the late 1940's might have been elicited by the use of drugs or hypnosis. Great concern over Soviet and North Korean techniques in "brainwashing" continued to be manifested into the early 1950's.

The drug program was part of a much larger CIA program to study possible means for controlling human behavior. Other studies explored the effects of radiation, electric-shock, psychology, psychiatry, sociology and harassment substances.

The primary purpose of the drug program was to counter the use of behavior-influencing drugs clandestinely administered by an enemy, although several operational uses outside the United States were also considered.

Unfortunately, only limited records of the testing conducted in these drug programs are now available. All the records concerning the program were ordered destroyed in 1973, including a total of 152 separate files.

In addition, all persons directly involved in the early phases of the program were either out of the country and not available for

<sup>1</sup> A few audio-surveillance devices developed by the Science and Technology Directorate have been used by the Office of Security in the course of investigations of persons within the United States. In addition, several devices developed by the Agency have been used by other

interview, or were decreased. Nevertheless, the Commission learned some of the details surrounding several tests of LSD conducted on unsuspecting subjects between 1953 and 1963.

The possibility, and the importance, of testing potential behavior-influencing drugs (including LSD) on human subjects was first suggested in 1953. It was also suggested at that time that Agency trainees might be utilized as test subjects. Any such testing was to be carefully supervised and conducted only in the presence of a qualified physician.

Following laboratory testing of LSD and other potential behavior-influencing substances, a few tests were run on voluntary participants. Commencing in 1955, under an informal arrangement with the Federal Bureau of Drug Abuse Control, tests were begun on unsuspecting subjects in normal social situations. Testing was originally conducted on the West Coast. In 1961, a similar testing program was initiated on the East Coast.

In 1963, the Agency's Inspector General learned of this program and questioned the propriety of testing on unsuspecting subjects. The Inspector General reported that in a number of instances, test subjects became ill for hours or days following the application of a drug. There was one reported incident of hospitalization, the details of which could not be learned by the Commission because of the destruction of the records and the unavailability of witnesses.

The Commission did learn, however, that on one occasion during the early phases of this program (in 1953), LSD was administered to an employee of the Department of the Army without his knowledge while he was attending a meeting with CIA personnel working on the drug project.

Prior to receiving the LSD, the subject had participated in discussions where the testing of such substances on unsuspecting subjects was agreed to in principle. However, this individual was not made aware that he had been given LSD until about 20 minutes after it had been administered. He developed serious side effects and was sent to New York with a CIA escort for psychiatric treatment. Several days later, he jumped from a tenth floor window of his room and died as a result.<sup>2</sup>

The General Counsel ruled that the death resulted from "circumstances arising out of an experiment undertaken in the course of his official duties for the United States Government," thus ensuring his survivors of receiving certain death benefits. Reprimands were issued by the Director of Central Intelligence to two CIA employees responsible for the incident.

<sup>2</sup> There are indications in the few remaining Agency records that this individual may have had a history of emotional instability.

As a result of the Inspector General's study of this drug program in 1963, the Agency devised new criteria for testing substances on human subjects. All further testing of potentially dangerous substances on unsuspecting subjects was prohibited. Between 1963 and 1967, some testing of drugs continued, but only on voluntary subjects, primarily inmate volunteers at various correctional institutions. In 1967, all projects involving behavior-influencing drugs were terminated.

It is presently the policy at CIA not to test any substance on unsuspecting persons. Current practice in all experimentation is to adhere strictly to Department of Health, Education and Welfare guidelines concerning the use of human subjects, and all current CIA contracts carry language to that effect.

## **2. The Testing of Communications Intercept Systems Within the United States**

Monitoring of foreign conversations is an important aspect of modern intelligence collection. Several new systems developed by the Agency for use overseas have been tested in the United States. In the process of this testing, private communications, presumably between United States citizens, have sometimes been overheard.

In many cases conversations were overheard but not recorded. In other cases, conversations were recorded for evaluation purposes but the recordings were kept only until the testing was concluded, at which time they were destroyed.

No evidence was found that any such tests were ever directed against persons for the purpose of learning the content of any communication. In most instances, the speakers were never identified. Nor was any evidence found that the Agency disseminated or ever attempted to exploit the contents of any intercepted or recorded conversations.

## **3. Other Testing Within the United States**

Various branches of the Science and Technology Directorate are involved in the testing of other new devices and procedures such as chemical warfare detection equipment, new means of measuring physiological responses in humans and photographic interpretation systems.

### **Conclusions**

It was clearly illegal to test potentially dangerous drugs on unsuspecting United States citizens.

The testing of equipment for monitoring conversations should not be directed against unsuspecting persons in the United States. Most of the testing undertaken by the Agency could easily have

been performed using only Agency personnel and with their full knowledge.

### **Recommendation (27)**

In accordance with its present guidelines, the CIA should not again engage in the testing of drugs on unsuspecting persons.

### **Recommendation (28)**

Testing of equipment for monitoring conversations should not involve unsuspecting persons living within the United States.

## **B. Other Selected Activities of the Science and Technology Directorate**

### **1. The Manufacture and Use of Documents**

The Agency maintains a capability for producing and providing to its agents and operatives a wide range of "alias" credentials. Most such documents purport to be of foreign origin. Some, however, are documents ordinarily issued by other branches of the U.S. government or by private United States businesses and organizations.

Among the United States "alias" documents furnished from time to time to Agency personnel and operatives are Social Security cards, bank cards, professional cards, club cards, alumni association cards and library cards. The Agency has recently stopped producing alias driver's licenses, credit cards and birth certificates, unless needed in a particularly sensitive operation and approved in advance by the Deputy Director of Operations.

While the Agency does not produce false United States passports, it has in the past altered a few by the addition of entries to evidence travel which had not actually occurred.

The purpose of alias documents is to facilitate cover during CIA operations. These documents are not "backstopped," i.e., manufactured with the consent and knowledge of the company or organization whose card is being manufactured. They are useful only as flash identification. Only the Social Security Administration has been told that the Agency is manufacturing its cards.

The Commission found no evidence that any Agency employee has ever used false documentation of this kind to his personal advantage.

### **Conclusions**

Alias credentials are necessary to facilitate CIA covert operations overseas, but the strictest controls and accountability must be main-
